

Are you eager to learn new things and constantly seek for new challenges? Do you have some experience with C++ and a plan to learn much, much more? If the answers to these questions are yes, we're looking forward to you becoming a part of Elitnet's highly skilled and professional team in Kaunas, Lithuania.

WHO WE ARE

Elitnet is the leading regional telecommunications solution provider which supplies major European and American mobile network operators and enterprise markets with cutting-edge software solutions. Over nearly 20 years of experience in the industry, we've created and refined a wide range of products, including innovative platforms which run voice, messaging, and data services, advanced network security solutions, and value-added services which ensure customer satisfaction.

We believe that our professional, experienced, and motivated team is the core reason we've been able to constantly provide top products to top customers. We're always looking for both fresh and experienced developers to bring their talent to our team and grow, improve, and face new challenges on a daily basis.

REASONS TO JOIN OUR TEAM

Challenging Projects. Participate in projects where complexity, high loads, and high real-time performance are your everyday companions. Providing innovative solutions to major mobile networks is never easy, but always rewarding.

Personal Improvement. Grow as a professional and learn new things every day by working with top talent in the telco industry, using specially appointed work time and budget to study new technologies, and participating in R&D activities.

Constant Involvement. You'll always have the opportunity to get involved in all parts of the project life-cycle and make an impact on choosing the technologies, processes, frameworks, and tools which ensure the straightest way to successful project completion.

Flat Command Chain. Small project teams and flat organizational structure ensure easy communication and constant brain-sharing within the company.

You won't have to explain your issue to several levels of managers to reach the decision maker – you can always communicate directly with the person responsible for the project.

Flexible Schedule. Plan your schedule according to your own requirements and easily combine working with studying.

Competitive Salary. Earn an industry-standard skills and performance based salary and receive bonuses which depend on the achieved results.

OUR EXPECTATIONS

- Motivation to learn and improve yourself and those around you.
- Eagerness to face and seek for new challenges.
- Great teamwork skills.
- Basic experience in the C++ programming language.
- Fluency in English, particularly reading and writing.

Interested in joining our team? Any additional questions? Let us know.
