

DARBO PASIŪLYMAS

Mechanical Design - Engineer

„Ruptela“

We provide fleet management solutions based on GPS tracking and real-time vehicle monitoring and control. We develop and manufacture full solution and provide it along with in-depth knowledge and support. More about us: <https://www.youtube.com/watch?v=cqRWaz0WTBA>

Job Description

- electronics housing designing (SolidWorks);
- designing simple mechanical structures (e.g. mounts, holders, etc.);
- product packaging design and research.

Requirements

- previous experience with SolidWorks software;
- very good English language skills;
- higher education in engineer, mechanics or related field;
- interest in new technologies.

Advantage would be:

- good knowledge of electronics;
- documentation experience;
- experience in designing electronics housings (plastic and metal);
- experience in housing material and component parts selection.

We Offer

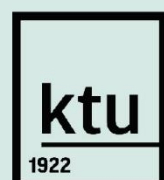

- creative and international environment;
- friendly and professional people around;
- professional and personal learning opportunities;
- Up to date working methods and best practices.
