

Intern Engineer

Software Development Job Description

THE COMPANY

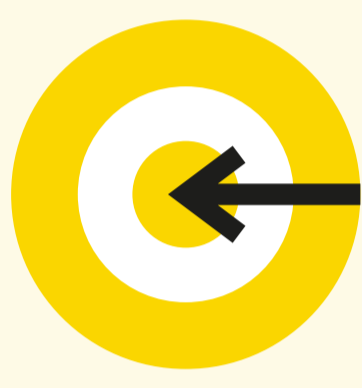

TransUnion is US based credit reporting agency that provides data/insights and information to help consumers and businesses make informed decisions. It operates in more than 30 countries and has more than 7000 employees. The company provides customer credit reporting, portfolio management, marketing and audience segmentation, healthcare revenue cycle management, customer acquisition, investigations and collections, fraud detection and prevention, identity verification and authentication, customer analytics and consulting, data breach, and customer engagement solutions.

THE TEAM AND THE CULTURE

This role is for the **KITE** initiative group of TransUnion Lithuania. **KITE** is a group of internal IT enthusiasts who want to acquire or expand their technical skills and work on our internal projects.

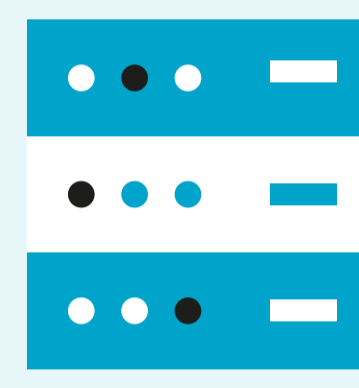

As intern you will be working on our internal certificate maintenance system supported by technical area professionals. This project is a greenfield opportunity to work with latest technology stack and understand full process of end to end delivery.

We work using Agile practices in small, focussed and autonomous teams. Each team is driven by a strong product management approach and takes responsibility for their own delivery.

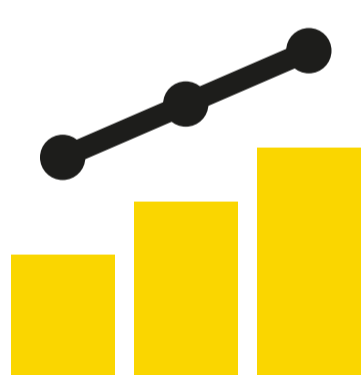

THE ROLE

As a engineering intern your main goal will be improve your technical knowledge delivering agreed roadmap in accepted quality and timescales. You will have to collaborate with product owner to understand roadmap, delivery manager to understand the way we work and test engineers to ensure that your developed software meets client expectations.

THE TECH

At TransUnion we have a wide range of technology in play but for this role in particular you'll be working with LAMP suite (Linux, Apache, MySQL, PHP). Ideally we're looking for someone who has a passion for development and also has some experience of or desire to learn PHP programming.

WHAT DO WE EXPECT FROM YOU

- ✓ Basic PHP, PHP framework, design patterns, OOP knowledge
- ✓ Logical mindset
- ✓ Willingness to work in Agile team and improve technical skills
- ✓ Fluent communication in English

WHAT YOU WILL GET IN RETURN

- ✓ Opportunity to be a part of Agile team following high standard SDLC process
- ✓ Private health insurance package
- ✓ MSDN Subscription, for all of your software needs
- ✓ Regular Code Dojos, 'Lunch Bytes', Open Space forums, and other learning opportunities
- ✓ Team building and company events
- ✓ Employee referral program
- ✓ Possibility to attend Zalgiris Arena lodge
