

Become one of Oracle's #FutureCreators, join us in building a true enterprise-grade cloud platform.

Oracle recently opened its first Lithuanian development office in Kaunas and is looking for passionate engineers to take the front row seat in the development of Cloud Infrastructure Web Application Firewall.

What are we looking for?

- Passion for technology
- 1+ years of experience as Software Developer or in using tools to test frontend and backend systems
- Basic understanding of how cloud computing works or be ready to gain this knowledge

What's in it for you?

- Access to great learning opportunities and professional development
- Being part of a team of highly motivated engineers that will bring the latest cloud technologies to the market
- Chance to work with various technologies such as NodeJS, Python, Lua, Go, C, etc.
